

Index

A

actuator, 271, 273, 274, 280, 281
Algebraic Riccati Equation, 48, 49, 246
along-track, xvi, 86, 98–101, 103, 105,
114, 119–121, 243
along-track boundedness condition, 146,
169
amplitude correction, 119
analytical mechanics, 39, 40, 57, 83
apoapsis, 20, 116
argument of latitude, 6, 17, 25, 43
argument of periapsis, 19, 24, 35, 124,
126
ascending node, 23, 24, 35, 124, 170
autonomous dynamical systems, 42, 97
averaged orbital elements, 143, 145, 245
averaged relative motion, 143, 165
averaging, 36, 38, 143, 168, 169
averaging operator, 36
axial accelerometer, 273

B

ballistic, 90, 222, 247, 305
ballistic coefficient, 4, 222, 247, 305
Black Hole Imager, 10
bordered Hessian, 47, 57, 69, 70, 74
bosons, 31
Brouwer transformation, 43, 45, 57, 145
Brouwer's satellite theory, 39, 41

C

canonical transformations, 39, 41, 42
carrier-phase bias, 287, 291
chaser, xvi, 92, 279, 280
chief, xv, xvi, 92, 98, 99, 101
Cholesky factorization, 54, 56
circle, 20, 21, 87, 116, 117, 130, 136
classical orbital elements, 25, 30, 31, 35,
124, 129, 252

clock drift rate, 287, 289
clock offset, 287, 289
Clohessy–Wiltshire equations, 84–86, 89,
90, 94, 95, 97, 99, 103
closed orbit, 19, 20, 130
CLUSTER, 8, 9
co-orbital motion, 75, 99
colatitude angle, 34
commensurability, 59, 60, 64, 66, 71, 75,
82, 124
configuration space, 40, 63, 72, 96, 124
conic equation, 19
conic sections, 19, 20
conjugate momenta, 40, 41
conservation of angular momentum, 18,
78
conservation of energy, 18
constant of motion, 21, 78, 80
constellation, 1, 4, 5
constraint-enlarging approach, 306
continuous noise, 277
Control Lyapunov Functions, 47, 57, 241,
243, 244, 269
convex optimization, 279
coordinate systems, 14–16, 35
cotangent space, 40
COWPOKE (Cluster Orbits with
Perturbation of Keplerian
Elements), 146
critical inclinations, 164, 189, 190, 224
cross-track, xvi

D

DARWIN, 9
Delaunay variables, 39, 41, 43
deputy, xv, xvi, 127, 243, 247, 248
deputy-fixed frame, 72
descending node, 23

differential orbital elements, 132, 137,
155, 170, 178
discrete noise, 277
Discrete-time Linear Quadratic Regulator,
49, 249–251
distributed space systems, 1

E

Earth-centered Earth-fixed, 15, 287–289
Earth-centered inertial, 14, 15, 17, 26
eccentric anomaly, 21, 23, 107, 108, 130
eccentricity, 19, 20, 24, 35, 61, 87, 90
eccentricity vector, 21, 24, 126
Ecliptic plane, 13, 14
ellipse, 19–22, 30, 87, 90, 128, 136, 311
elliptic cylinder, 87, 88
elliptic torus, 128, 130
energy matching condition, 60, 64, 65, 68,
75, 76, 82
epicyclic motion, 75, 130, 131
epoch, 21, 128, 132, 181
equilibria continuum, 75
equinoctial elements, 25, 81
error box, 306–309, 312, 313
estimated velocity, 273–275, 277
Euler parameters, 26, 27, 147, 150, 227,
229
Euler vector, 27
Euler–Hill frame, 60, 68, 71, 72
Euler–Lagrange equations, 40, 78, 95
Extended Kalman Filter, 49–53
external torques, 231, 232

F

f-correction, 119
feature points, 228, 232, 236
fictitious, xv
foci, 19, 20
follower, xv, xvi, 2, 60, 101
formation maintenance, 169, 241,
243–247, 249, 251
formation-keeping, 60, 68, 71, 72, 224
Fourier series, 119, 124, 129, 131
fuel balancing, 212, 220, 261, 262, 266
fundamental frequency, 145, 212, 249

G

gauge function, 31
gauge velocity, 31
Gauss variational equations, 30, 34, 35

general circular orbit, 87, 243, 253
general solution, 25, 94, 113, 127, 128
generalized coordinates, 40–42
generalized velocities, 40
generating function, 42, 43, 161
geocentric, 14, 23
Geometric Method, 150, 163, 164, 182
GRACE, 8, 9
guidance, 3, 5, 90, 330

H

Hamilton's equations, 40, 96
Hamiltonian, xvi, 40, 41, 83, 158, 183,
185, 186
heliocentric, 14
Hessian, 47, 69, 70, 74
Hill's equations, 84, 308
Hill's solution, 124, 135, 136
Hill–Clohessy–Wiltshire equations, 84
hybrid differential equations, 138, 141
hyperbola, 20, 30

I

impulsive, 68, 71–73, 241, 249, 254, 272
inclination, 24, 25, 35, 185, 186, 246,
247, 282
inertial coordinate system, 14, 112
internal coupling, 232
 J_2 -invariant relative orbits, 190

K

Kalman Filter, 49, 50
Kepler's equation, 21, 103, 125, 127, 133,
145, 160
Keplerian orbits, 19, 20, 22, 59, 78, 82
kinematic perturbations, 235
kinematic positioning, 291
kinematics, 14, 229, 232
kinetic energy, 18, 77, 78
Kustaanheimo–Stiefel orbital elements,
27

L

Lagrange brackets, 32
Lagrange constraint, 30, 31
Lagrange gage, 31
Lagrange matrix, 32
Lagrange multipliers, 46, 47, 69
Lagrange's planetary equations, 30, 33,
37, 123

Lagrangian, 40, 46, 47, 57, 83, 95
 Laplace–Runge–Lenz vector, 21
 Laser Interferometer Space Antenna, 10
 leader, xv, xvi, 2, 9, 60
 Legendre polynomial, 34, 77, 78, 97
 Legendre transformation, 40, 78, 96
 libration, 75, 76
 line of apsides, 20, 21, 87
 line of nodes, 23, 24, 124, 125, 128
 linear Hamiltonian equations of relative motion, 96
 linear programming, 117, 280
 Linear Quadratic Regulator, 48, 241, 245, 246
 local-vertical, local-horizontal, 6, 16, 30, 35, 310
 Lyapunov's theorem, 48

M

Magnetospheric Multiscale Mission, 10, 151, 190, 208
 mean anomaly, 21, 35, 132, 145, 168, 189, 282
 mean anomaly at epoch, xvi, 21
 mean argument of latitude, 25, 160, 200
 mean classical orbital elements, 37, 252
 mean element control law, 244
 mean motion, 21, 44, 92, 127, 151, 165, 279
 mean value, 36, 280, 300, 301
 Milli-Arc-Second Structure Imager, 10, 11
 modified Kepler equation, 160

N

New Worlds Observer, 10
 non-integrable Hamiltonian system, 80
 non-osculating orbital elements, 31
 nonlinearity error index, 185
 nonsingular orbital elements, 25, 45, 173, 244
 normal, xvi, 14–17, 21, 62

O

objective function, 46, 69
 open orbit, 20
 Orbital angular momentum, 13, 15, 17
 orbital element differences, 132
 Orbital plane, 13, 15–17, 23
 osculating element control law, 244

osculating orbit, 30, 82, 149, 170, 172
 osculating orbital elements, 31, 32, 146, 182, 270
 osculation constraint, 30, 148
 out-of-plane, xvi, 195, 247, 250, 256, 283

P

parabola, 20
 parameter, 19, 28, 42, 54, 69
 performance index, 48, 222, 253, 254
 Periapsis, 13, 15, 20, 22, 23, 35
 perifocal, 15, 21–24, 26
 planning controller, 7, 306
 Poisson brackets, 33, 161, 162, 167
 Poisson matrix, 33
 polar rotating coordinate system, 16
 potential energy, 18, 40, 65, 78, 94
 primary, 13–16, 34, 36
 primer vector, 106
 PRISMA, 9, 271
 projected circular orbit, 88, 98, 119, 253, 254, 256, 257
 pseudo-potential, 64
 pursuer, xvi, 92

Q

quasi-periodic, 64, 127, 130, 131, 141, 245
 quaternion, 26, 27, 147, 229

R

radial, xvi, 185, 186, 190, 213, 222, 243, 245, 308
 rates of change, 14, 218
 reference frames, 14, 155, 185, 227
 reference orbit, xv, 123, 129, 241, 246, 256, 279, 282, 283
 reference point, xv
 relative motion invariant manifold, 127, 141
 relative orbital elements, 125, 141
 rendezvous, 90, 92–94, 106, 120
 restricted two-body problem, 17
 right ascension of the ascending node, 24, 35, 236
 Rodrigues formula, 34

S

semilatus rectum, 19, 23, 36
 semimajor axis, 20, 35, 45, 61, 72, 73

semiminor axis, 20, 136
 sigma points, 52–54
 single-impulse formation-keeping, 60
 spacecraft formation flying, 1, 7, 8
 special orthogonal group, 24
 spinor, 27
 stable subspace, 86
 static optimization, xvii, 39, 46, 69
 Stellar Imager, 10
 symmetry, 29–31, 39, 52, 119
 system matrix, 85

T

t-correction, 119
 tangent space, 40, 63
 target, xvi, 92, 94, 279–281
 targeting, 90, 91, 93
 TechSat-21, 8
 thrust-free, 90, 329
 thruster, 274, 280, 282, 284, 285
 total energy, 18, 21, 22
 total gravitational potential, 79
 total orbital energy, 20
 true anomaly, 19–22, 35, 36, 103, 105,
 106, 108, 253
 Tschauner–Hempel equations, 83, 106,
 121, 151
 two-body problem, 13, 16, 21

two-impulse linear rendezvous, 90

U

unit circle, 75, 76, 130
 unit-sphere approach, 143, 144, 182
 Unscented Kalman Filter, 52–54
 unstable, 86, 289

V

variation-of-parameters, 28, 30, 31
 variational principles, 39, 40
 Vernal equinox, 13, 14, 24
 Vinti representation, 34
 virtual, xv, 2, 220, 305
 virtual aperture, 1
 virtual platform, 1
 vis-viva, 18, 101

W

weight matrices, 48

X

XEUS, 9

Z

zonal gravitational harmonics, 33
